

SAMHEUNG
ELECTRIC
Co., Ltd.

NO.1

**SAMHEUNG
ELECTRIC**

Co., Ltd.

We always listen to
customers' voice

Quality directions

Samheung Electric is growing into a customer-reliable corporation through advanced design and flawless quality development that meet customer needs. We always listen to customers' voice through our strong and fast organization culture. Samheung Electric has been committed in technical development for high-voltage incoming

panels and automatic streetlight control panels. Based on IOT-based full-duplex control technology in the future, we are growing into a fast and strong corporation along with our business clients by expanding our business fields in smart distribution panels, smart management systems, Smart PM systems, etc.

Employees of Samheung Electric

History

2012

- 04 Samheung Electric Co., Ltd. founded
(capital: 200 million won)
- 07 Registered as an electric engineering business

2014

- 03 Registered as a cooperator for LS Mtron
- 05 Registered as a cooperator for TK Chemical
- 09 Registered as a cooperator for SK Siltron
- 10 Registered as a cooperator for LG Innotek

2016

- 03 Certified as a female-owned business
- 08 New factory constructed and relocated
- 10 Registered as a cooperator for the Korea Expressway Corporation

2018

- 01 Registered 12 products of street load centers in the comprehensive shopping mall, Korea ON-line E-Procurement System
- 07 Registered enclosed-type distribution panels, motor control centers, control panels, distribution panel, load centers in the comprehensive shopping mall, Korea ON-line E-Procurement System
- 09 Streetlight dimming control device (dimming controller, dimming model) KC certified

- 2013**
- 10 ISO 9001, ISO 14001 certified

2015

- 02 Registered as a cooperator for POSCO ESM
- 03 Certified in a venture business confirmation
- 06 Signed an agreement to be an academic-industrial cooperator (Department of Electric Energy, Gumi University)
- 12 Capital increased (from 200 million to 400 million)

2017

- 02 Acquired the type approval for oil immersed type transformer (Korea Electrotechnology Research Institute)
- 02 Acquired the certificate of conformance with the risk analysis standards
- 05 research institute founded and certified (Ministry of Science, ICT and Future Planning)
- 05 Certificate of direct production (transformer, distribution board, motor control center)
- 06 Acquired the type approval for distribution board for streetlight (Korea Electrotechnology Research Institute)
- 06 Registered as a member of the Korea Industrial Technology Association
- 07 Official inspection test waived for oil immersed type transformers
- 07 Manufactory (new factory constructed)
- 09 Awarded by the Minister of SMEs and Startups
- 10 Conformance of electromagnetic wave from streetlight switch certified

● Enclosed switchboard

Identification No. : 23421473

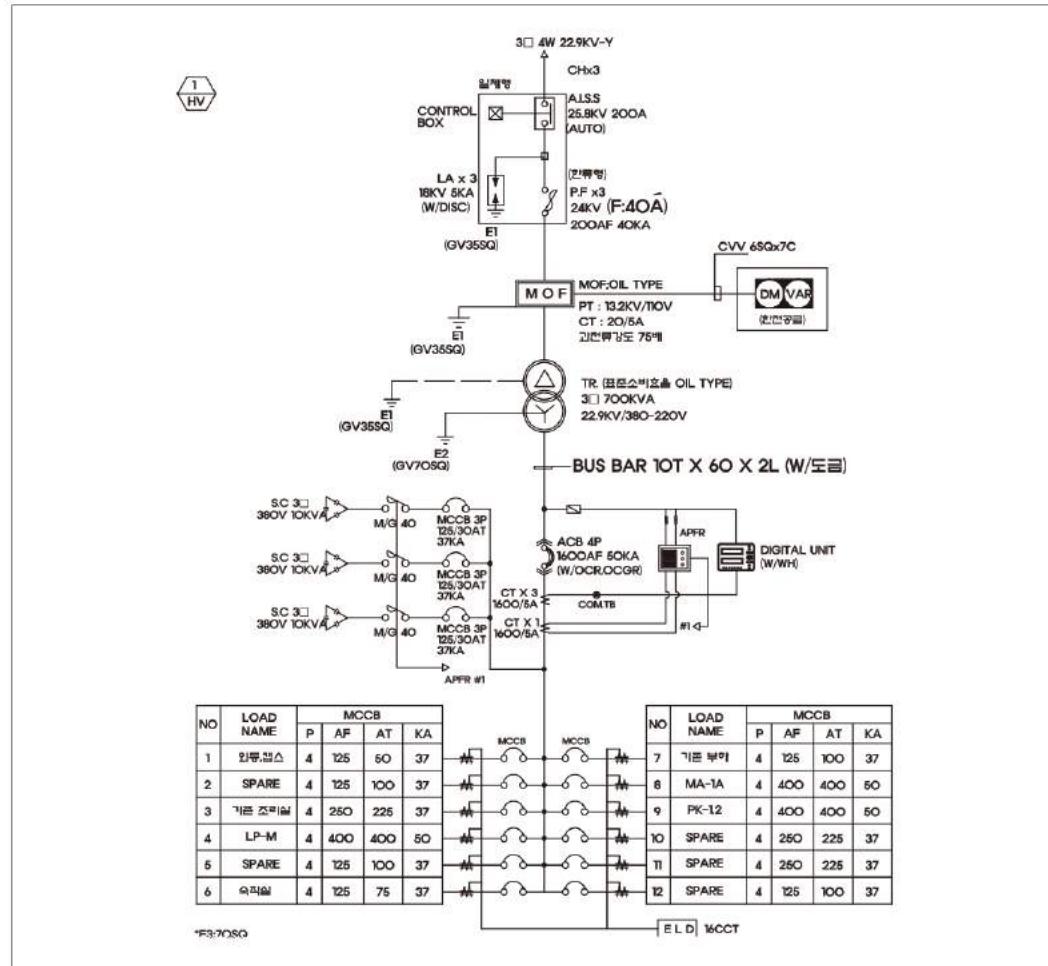

Components

- "PDC-Control" attached for real-time detection of condensation (dew point temperature) caused by internal temperature and humidity in the distribution board
- External temperature sensor, internal wall temperature sensor, and humidity center installed; ventilation fan for internal temperature control and preventative film heater installed
- Rainfall meter installed at the exterior of the housing (based on outdoor type)
- Real-time detection of the condensation point caused by the difference between internal and external temperatures to organically run the ventilation fan and film heater to effectively prevent condensation at the internal wall of the distribution board and PDU.

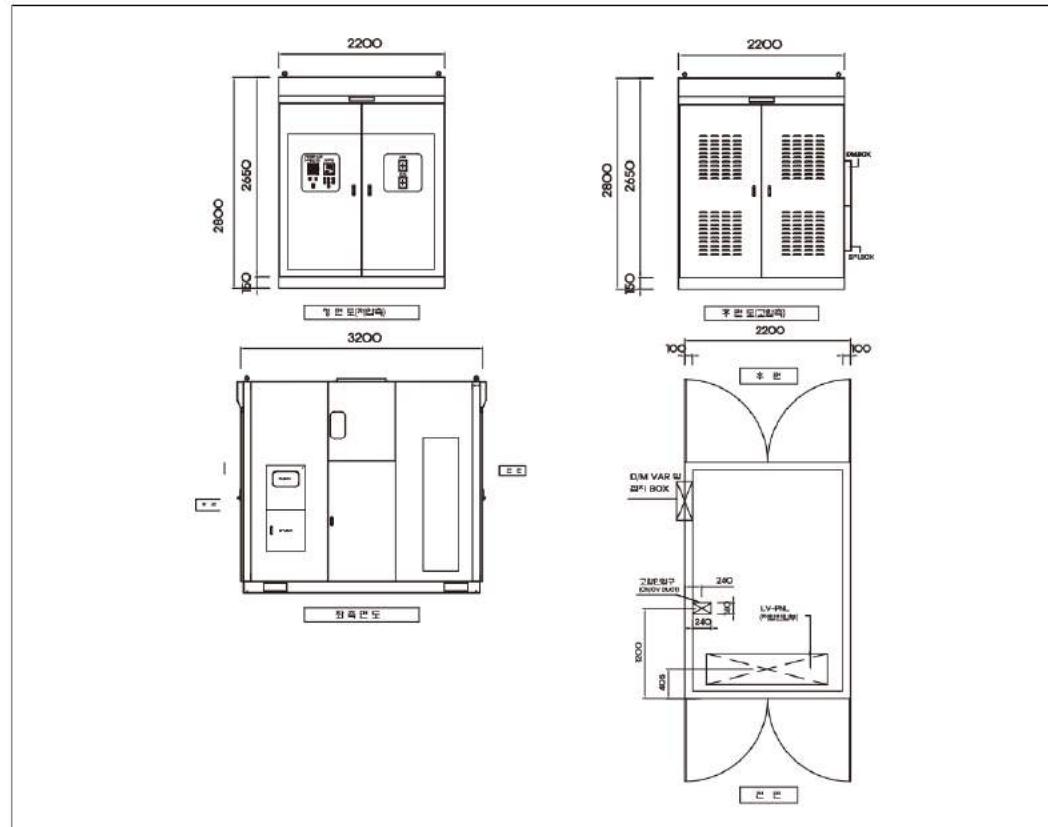

Note

Single line diagram

○ Motor control center (MCC)

Model : SH-MCC

Identification No. : 23421474

A motor power basis designed and produced for the safety and high reliability for field operation conditions. Excellent for capacity change and maintenance.

Features

- Excellent for maintenance and inspection. Highly stable for facility protection.
- Easy for cable duct construction and cabling.
- Excellent for additional expansion and modification.
- Easy unit withdrawal and lead-in
- Easy installation for narrow installation area

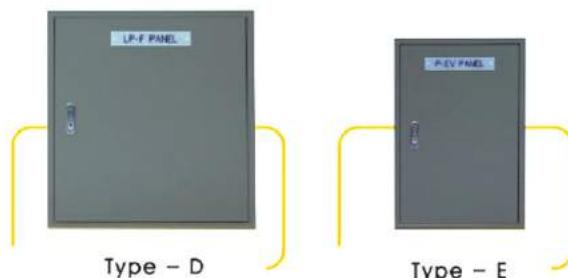

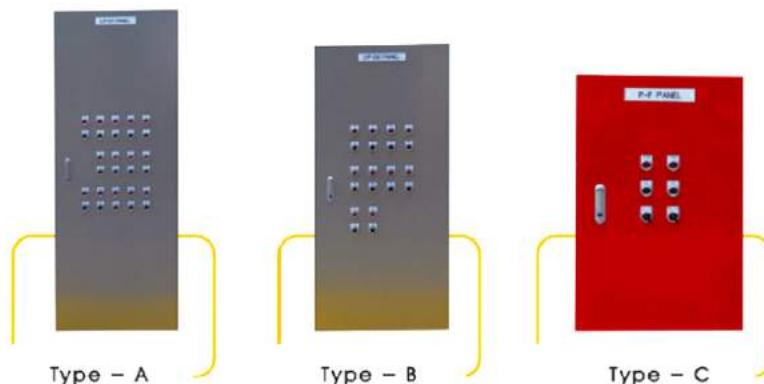

Distribution board

Identification No. : 23421475

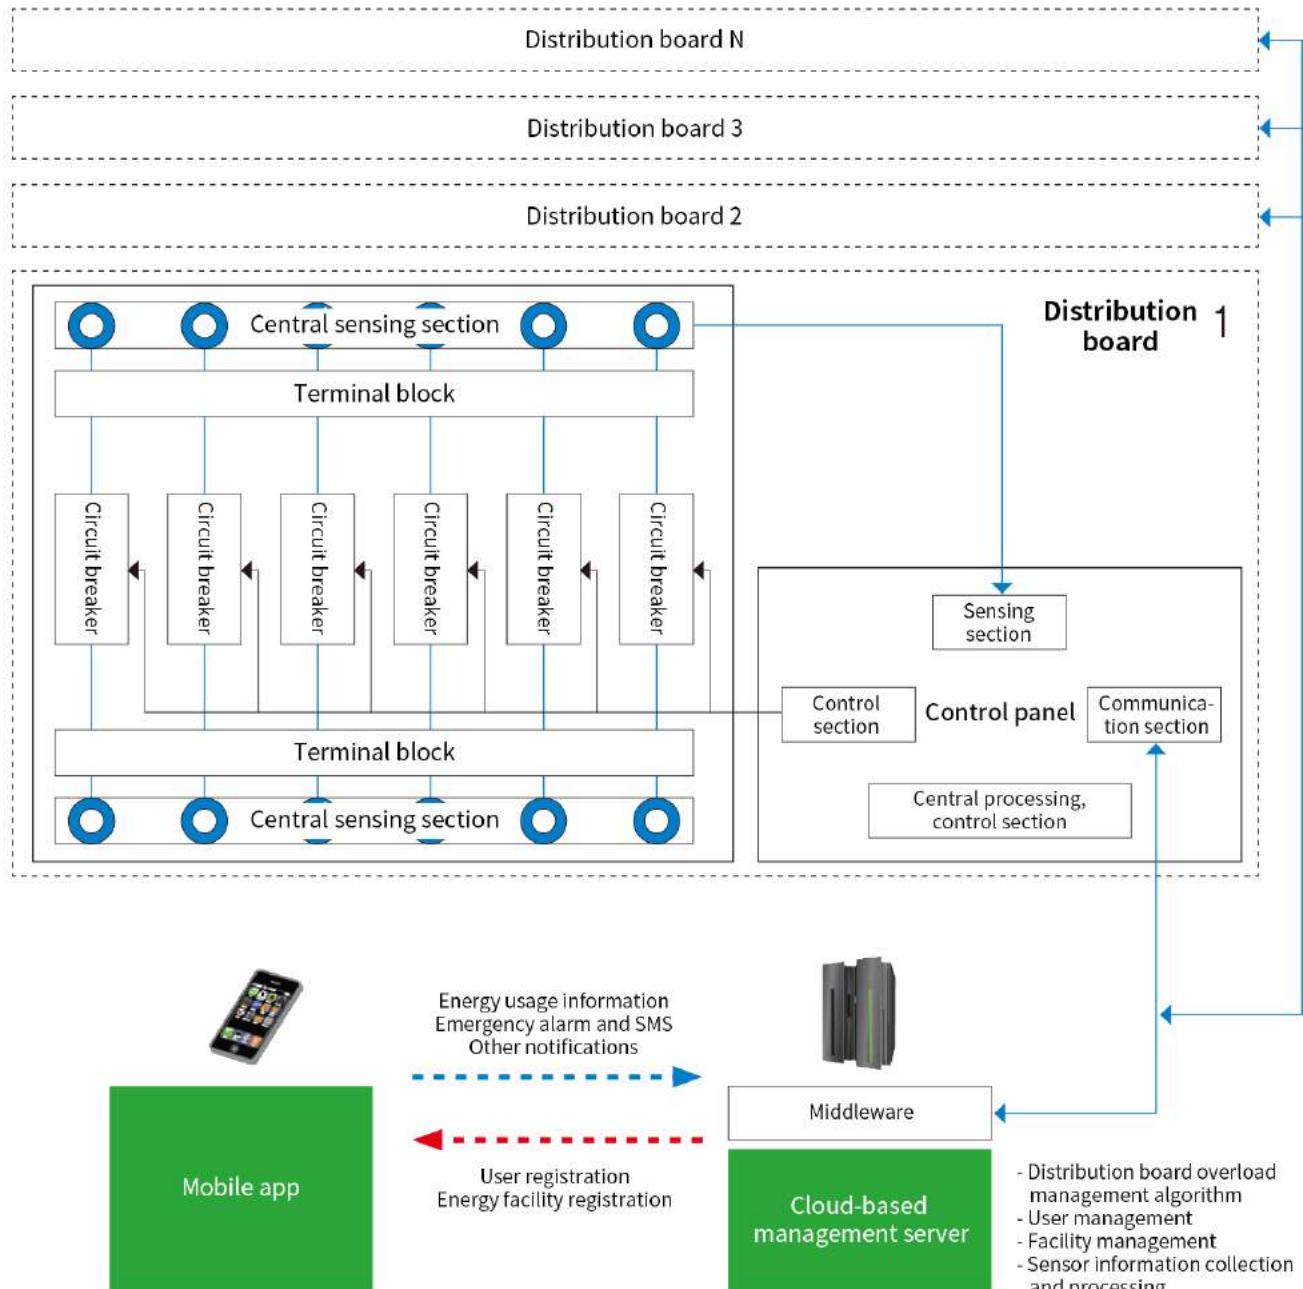

Excellent distribution board that meets various customer needs through sufficient consideration of field conditions and appropriate standardization for the purpose of the facility

Smart distribution board system

System diagram

- See the system information at a glance, using the beacon communication to send the data to each manager's smartphone App through real-time detection of power consumption, temperature, and humidity of the product!
- **Synchronization between the management system and APP that immediately applies the sensors the user needs**

Operating Voltage	DC24V
Impulse Withstand Voltage(1.2x50μs)	Main Boby : 150kV Control Circuit : 5kV
Min. Operating Current	PHASE 10, 20, 30, 50, 70, 100, 140, 200 (Block) GROUNG 5, 10, 15, 25, 35, 50, 70, 100 (By-pass) * Max. Over Current : 800A

Certificates

SAMHEUNG
ELECTRONIC

KSC8324-distribution board

Award certificate
(Minister of SMEs and Startups)

Streetlight distribution board
performance report

Certificate of official test waive
for transformers

Direct production certificate
for transformers

High-efficiency certification for
oil immersed transformers 300kVA

High-efficiency certification for
oil immersed transformers 500kVA

High-efficiency certification for
oil immersed transformers 600kVA

High-efficiency certification for
oil immersed transformers 700kVA

High-efficiency certification for
oil immersed transformers 750kVA

Certificate of streetlight
GPS control panel

Certificate of streetlight
full-duplex control panel

Certificate of automatic
streetlight switch GPS

Certificate of automatic
streetlight switch full-duplex

Certificate of automatic
security light switch GPS

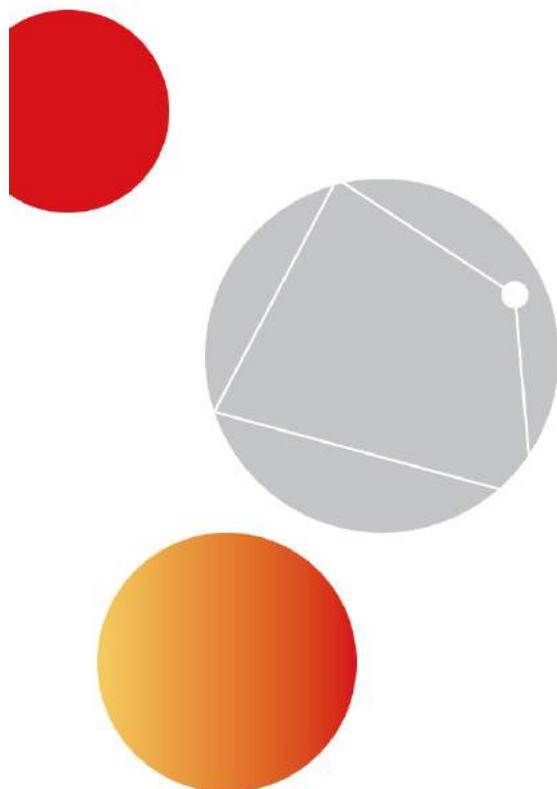

Certificate of automatic
security light switch electronic-type
